Beings of pure magic once ruled the world with power and command. But power rarely leads to contentment... A dispute amongst these beings turned into an all-out war. Beasts of doom, known as Espers, were created and unleashed to do the bidding of their masters. This "War of the Magi" reduced the world to smoldering rubble. When it ended, the Espers were gone, as were most of the citizens of the world.

Beasts of doom, known as Espers, were created and unleashed to do the bidding of their masters.

Many centuries have passed since the war. Civilizations have been rebuilt with iron, machines and technology. For years the Espers have existed only in ancient legends. Now, an Esper has been discovered and the forces of magic are beginning to return. The risk of another, more devastating war is growing. The future
**Controls**

There are two main types of actions that you’ll experience in playing Final Fantasy III: fighting and traveling. The methods of control are different for each activity. Here’s a basic rundown:

**Super NES Controller**

- **L/R Button**
  - In fighting scenes, you can press the L Button or the R Button to make a spell affect all of your enemies. You can also attempt to run from a fight by pressing and holding both buttons.

- **X Button**
  - Use the X Button to go to the subscreen while you’re in the field or in towns. The X Button also allows you to go to the action inside the flying Airship and to skip party members in battles.

- **Y Button**
  - In multi-party battles, you can switch from one party to the next by pressing the Y Button. You can also use it to show the Magic Points needed for spells in the spell list.

- **A Button**
  - The A Button is the main action button. With it, you can talk to villagers, open treasure chests and push switches. You can also use the A Button to confirm choices in all menus and the subscreen. Move the cursor to the appropriate space with the Control Pad, then press the A Button to make the selection. In vehicle driving scenes, the A Button allows you to make the Chocobo or Airship move forward.

- **B Button**
  - In most cases, the B Button cancels the last choice you made. It also lets you climb off Chocobos and the Airship.

- **Control Pad**
  - Use the Control Pad to move your party across the field, to move the cursor on menu screens and to steer Chocobos and Airships.

- **Start Button**
  - The main function of the Start Button is to pause the action in battle scenes. Press the Start Button for a breather while you’re fighting. You can also use it to turn the field map on and off while traveling and to complete the name-entering process.

- **Select Button**
  - Press the Select Button in menu screens with long lists to scroll the length of an entire screen.
Special Controls  Name Input

When a new character is introduced into the game, you can keep the pre-set name by pressing the Start Button, or change the name to something else.

A Button  Use the A Button to confirm each letter and move on to the next space.

B Button  You can erase a letter in the name and move back one space with a tap of the B Button.

Control Pad  Move the cursor through the alphabet with the Control Pad.

Start Button  Press the Start Button when you have arrived at a name to your liking.

You can stay with the name that appears automatically or change the name. The name must be made of six or fewer letters.
Special Controls

Vehicles

When you're riding Chocobos or Airships, enemies in the field cannot attack. Both types of vehicles are controlled in similar ways.

**Chocobos**

The Chocobo is an ostrich-like bird that travels on the ground. When you dismount, it will run back to its stable.

- Press Up to move forward.
- Press Left and Right to turn.
- Press A to move forward.
- Press B to dismount.

**Airships**

When you secure the Airship, you'll be able to explore the world quickly and freely.

- Press Up or Down to adjust height.
- Press Left and Right to turn.
- Press A to move forward.
- Press B to leave the Airship.
- Press X to switch your view to the inside.
- Press Y to turn the Airship when it's not moving.
- Use these to make high-speed turns.
Getting Started

The game pak's built-in battery holds as many as three saved game files. If there are saved files, you'll have the choice to continue a quest or start a new game.

Beginning Anew

If there are no saved files, the game will begin with the introductory story, without showing the saved file screen. Shortly after you begin, you'll arrive at a place where you can save the game to a new file.

Continuing a Quest

If the battery is keeping one or more saved files, you will have the option at the beginning of the game to choose a file and continue a quest. Move the cursor to the desired file and press the A Button.

New Game

You can start a new game even if the battery is keeping saved files. Move the cursor to the New Game option on the saved file screen and press the A Button. The game will start from the beginning.
Saving Progress

When you save the progress of your adventure, you can replace an old file or choose an empty file. The Save option is on the subscreen. If the option is highlighted, you can save the game by moving the cursor to the word “Save” and pressing the A Button.

Safe to Save

You can save your progress at any time in the field or at specific “Save Points.” If the Save option is available, the word “Save” will be highlighted on the subscreen.
**Subscreen**

The subscreen gives you access to important information about your party and allows you to make decisions relating to the party and the game in general. Press the X Button to enter the subscreen.

### Your Party
In this section of the subscreen, you can examine the members of your party and take a look at their current status.

### Commands
- Items: See Page 16
- Skills: See Page 18
- Equip: See Page 20
- Relics: See Page 22
- Status: See Page 24
- Config: See Page 26
- Save: See Page 11

### Play Time
This entry keeps tabs on time invested in playing up to your current position.

### Steps / Gold
Here you can see how many steps your party has taken and examine your wealth.

### Name
The name of the character is shown here. If you've changed the name, the new name will be displayed.

### Character Close-Up
This depiction of the character's face is a good representation of what the character looks like.

### Level
As your character gains experience, his or her experience level increases as shown here.

### Hit Points
This entry shows the Hit Points that remain for the character and the Hit Point maximum.

### Magic Points
Current Magic Points and current Magic Point maximums are shown here.
Order in the Ranks

The members of your party can be positioned in any order you wish. Only the character in the lead will be shown as the party marches through the field.

Press Left on the Control Pad. The pictures of the party members will shift to the right and the cursor will appear on the left.

Move the cursor so that it points to one of the characters you would like to move, then press the A Button.

Move the cursor so that it points to the other character involved in the switch, then press the A Button again.
The members of your adventuring party can storm up to the front of every battle or they can stay back and take a more defensive position. This posturing dictates the amount of damage they will take and inflict.

Move the cursor so that it points to one of your fighters, press the A Button twice.

The fighter in question will change from the front to the back or from the back to the front.

A position on the front lines of the battle means a fighter will inflict as much damage as possible on the enemies.

By stepping to the back, fighters can be more defensive, taking and inflicting about half as much damage.
Item Screen

Special items can be used to recover Hit and Magic Points, and to cure your characters from various states. Items, unequipped Weapons and Relics are shown on the Item screen.

All of the items in your party’s possession are shown in this list. Use the ControlPad or the L and R Buttons to scroll through the list.

Item Commands

The Item commands allow you to use items, change the order of the list and display those items in the list which are very rare.

Press the B Button to make the cursor go from the Item list to the Item commands.

Choose a command and press the A Button to enact that command.
Using Items

All of the Items which are highlighted at any one time can be used. Choose an Item, then select the character who will use that Item.

Move the cursor so that it points to the desired Item, then press A.

Select the character who will use the Item, then press A again.

Weapons, Armor and Relics

Unequipped Weapons, Armor and Relics appear on the Item list. You can examine their properties from the list.

Move the cursor so that it points to a Weapon, type of Armor or Relic.

Push A twice, then Left to list the properties of the Item.

Arrange

The Arrange option organizes the Items in your list into groups of Items of similar types.
Skills

Special skills of your party members are accessible from the subscreen. Individual skills are also included as battle options.

Once you’ve switched to the Skills option, select a character and press the A Button.

You’ll have the option to look at highlighted Magic powers, Espers and any other Skills.

Espers

Mysterious beings known as Espers give Magic powers to fighters in your party when they are equipped by the fighters.

Equip a character with an Esper and accumulate Magic Points.

When enough Magic Points have been earned, the fighter equipped with the Esper learns the Esper’s spells.
Magic

Some characters automatically learn the use of Magic Spells. Others must be equipped with Espers in order to learn Spells.

Choose a Spell from the list and press the A Button.

Your target will vary depending on the nature of the Spell.

SwdTech
See Page 62

This special ability is unique to the character Cyan. He will learn up to eight powerful sword techniques over the course of the adventure.

Blitz
See Page 60

The Blitz technique is used by Sabin. After you choose to Blitz, you must press a series of buttons in order to enact one of up to eight techniques.

Lore
See Page 70

The character Strago is capable of learning up to 24 different Spells from enemy characters. In order to learn a Spell he must survive its power once.

Rage
See Page 64

Gau is a resident of the Veldt who can learn the fighting techniques of other Veldt characters.

Dance
See Page 56

The character Mog can quickly learn powerful, magical dances in each of the eight areas of the World.
**Equipping Fighters**

A fighter can hold equipment in each hand and wear Armor on his or her head and body. Equipping fighters increases their offensive and defensive power.

![Equipment Screen]

**Current Equipment**

**Equipment Commands**

**The Fighter**

**Current Powers**

**Equip**

The Equip command puts equipment on the selected fighter. Different pieces of equipment affect the fighter's powers in different ways.

![Equip Screens]

Select the hand, head or body to be equipped and press A. Yellow numbers indicate added strength. Gray numbers indicate less strength.
Optimum  The useful Optimum command equips the fighter in question with the available items that can add to that fighter's powers in the best possible way.

Choose the Optimum command and press the A Button.

The fighter will wear all of the best available equipment.

Rmove  By using the Rmove command, you can take away a particular piece of equipment from the selected fighter.

Empty  Use the Empty command on a fighter to remove all of that fighter's current equipment. Then re-equip the fighter anew.

Survey the Troops  With a quick command, you can call up a list of all the equipment your fighters are currently using.

Press Left when the cursor is flashing on the word "Equip." This will make the cursor point to all fighters.

Press the A Button. A list of the fighters and their currently equipped items will appear.
Relics are items that, when equipped, give fighters special abilities. Each fighter can be equipped with up to two Relics at once.

Select a Relic and press A. The Genji Glove in this example allows a fighter to carry a Weapon in each hand.

The Relic will work its magic and impart a special ability on the fighter.

Some Relics are best suited for particular characters, changing that character’s special powers. The Thief’s Glove, for example, makes Locke’s stealing capability more powerful.
As is the case with Weapons and Armor, some Relics change a fighter’s offensive and defensive strengths. You can see these potential changes before the Relics are officially equipped.

Some Relics add to a fighter’s offensive and defensive strengths.

The yellow numbers indicate an increase in power.

While all Relics have their good points, there are a trio of Relics which are particularly useful. They are:

**Sprint Shoes**

When any character in your party is equipped with this fast footwear, you’ll move with twice as much speed in all areas except the overworld.

**Wall Ring**

The incredible Wall Ring Relic makes enemy Spells bounce off of the equipped fighter and shoot back at the enemy.

**Black Belt**

The magic of the martial arts makes a fighter who is equipped with the Black Belt randomly counterattack when hit.
The Status screen clues you in on the experience, power and abilities of the members of your party. You can access the information from the subscreen.

A fighter's level of experience and his or her Armor and Weapons contribute to offensive and defensive powers. The Status screen allows you to analyze those factors. By looking at the Status screen, you can determine the strengths and weaknesses of the fighter in question.
| 1 | Experience | The Experience level of your fighter directly affects his or her maximum Hit Points, Magic Points and offensive and defensive powers. |
| 2 | Next Level | This entry lets you know the number of points your fighter needs to reach the next level. |
| 3 | Vigor | A fighter’s Vigor relates to his or her general strengths and abilities to take and inflict damage. |
| 4 | Speed | If your fighter has a high Speed rating, his or her Power meter will rise quickly after each attack in preparation for the next attack. |
| 5 | Stamina | If your fighter has a high Stamina level he or she will gain more Hit Points with the next rise in Experience Level. |
| 6 | Mag. Power | Magic Power indicates the offensive strength of your fighter’s Magic abilities. It should be low for fighters that don’t use Magic. |
| 7 | Bat. Power | Battle Power relates to your fighter’s total attacking power. If it’s high, he or she will be a powerhouse with the Fight command. |
| 8 | Defense | The Defense rating shows your fighter’s current defensive power, taking into account the Armor that he or she is wearing. |
| 9 | Evade | The Evade rating shows the percentage of enemy attacks aimed at the fighter in question which are likely to miss. |
| 10 | Mag. Def. | Magic Defense relates to the power of the fighter’s magic abilities to ward off or weaken enemy attacks. |
| 11 | M Block | Magic Block is the percentage of enemy Spells directed at your fighter and which are likely to fizzle out before they can cause damage. |
The two possible settings for Battle Mode are “Active” and “Wait.” These settings relate to the attack methods of your enemies. If the Battle Mode is set on “Active,” the enemies will attack whenever they have the power to do so. If the setting is “Wait,” the enemies will not attack while you are accessing menus in the middle of a fight.

**Active**
Active mode allows enemies to attack at will in fighting scenes, whenever they have enough power.

**Wait**
Wait mode keeps enemies from attacking when you’re looking through item and Magic menus.

**Bat. Mode**

**Bat. Speed**
The Battle Speed determines how quickly battles will be played out.

**Msg. Speed**
Message Speed makes screen text appear on the screen at various speeds.

**Cmd. Set**
The two Command Set options are “Window” and “Short.” These options relate to the way commands are laid out in fighting scenes. The “Window” configuration is the default method of displaying the commands. The “Short” configuration features a shorter window with commands arranged in a more compact manner.
The Command Set option allows you to choose between the "Window" or "Short" set-ups.

In the "Short" set-up, the fight commands are arranged in a three line format.

**Gauge**

This option allows you to turn off the power bar which shows the progress of your fighter returning to battle strength.

When the Gauge option is on, you can monitor the return to battle strength of each fighter.

When the Gauge option is off, your current Hit Points and maximum Hit Points are displayed.

**Sound**

The Sound option allows you to switch from stereo to mono output.

**Cursor**

With this option, you can make the cursor "remember" its position in a particular situation. This feature is useful if you always use a fighter to attack or defend in a certain way. You can set it up once, then simply press the A Button repeatedly to carry out the action.
Re-equip
When the Re-equip option is set on Optimum, the game will automatically re-equip your fighter with optimum pieces when you equip power-changing Relics.

Controller
While Final Fantasy III is generally a single-player game, you can use the Controller option to set the game up for use with two controllers in fighting scenes. The multi-controller feature allows you to assign individual fighters to Controller 1 or Controller 2.

Mag. Order
The Magic Order option affects the format of the Spells list. The configurations give varying priorities to different types of Spells. While one configuration puts healing Spells at the top of the list, followed by attacking Spells and effect Spells, another configuration reverses the order. There are six configurations in all.

Window
This option allows you to select one of eight different designs for window backgrounds.

Color
With the Color option, you can change the entire background, the color of the lettering in the game text ("font") and the borders around the edges of the windows.

Save
See Page 11
Once you've set all of the configurations to your liking, make sure to use the Save option on the subcreen to secure all of your choices.
Fighting Screen

When monsters attack, the encounter will take place in the fighting screen. This is where your preparation and battle strategies pay off.

1. Enemy attackers usually appear on the left side of the screen. If they ambush, they could appear on the right side or surround your party.

2. When the members of your party are energized to a point where they can make a battle action, their options appear here.

3. Several types of enemies may be attacking at once. The names of the enemy types are listed in the lower-left section of the screen.

4. Enemies and members of your party take turns carrying out battle actions. The current action is shown here.

5. The members of your party are shown on the right side of the screen, unless they've been ambushed. Their appearance indicates their current state.

6. Information relating to the current Hit Points and battle readiness of your party members is shown in the lower-right section of the screen.

Battle Example

1. When enemies attack, the members of your party are forced to fight them off in a face-to-face battle.

2. When the gauges of your fighters are full, they're ready to rumble. A list of possible commands for each fighter then appears.

3. Every fighter has the option to Fight, use an Item or practice a special Skill.

4. When the action for a fighter or an enemy has been decided upon, the fighting begins.

5. If your party manages to defeat all the attacking enemies, the battle will be won.

6. Victory brings Gold, Experience and Magic Points and, occasionally, a special Item, Weapon or piece of Armor.
Fighting Commands

When a member of your party is powered-up and ready to fight, a list of commands will appear in the lower-left section of the fighting screen. It’s up to you to decide exactly how your fighter will contribute to the effort.

**Fight**

A fighter given the command to “Fight” jumps into the middle of the action and hits the chosen target with his or her Weapon.

**Special Skills**

Many of the fighters in your party will have special Skills which will help them dispatch enemy attackers. These Skills often cause more damage to the enemies than a standard attack.

**Magic**

While few of your fighters will have Magic powers at the beginning of the adventure, they will have the opportunity to learn Spells from the Espers. After you’ve selected Magic as a fighting command, you’ll have a list of available Spells to choose from.

**Esper Magic**

When chosen, Espers can only attack once in every enemy encounter. Press Up on the Control Pad in the Magic menus to access the equipped Espers.
Most of your special items will provide Health and Power for the members of your party. When you use items, you’ll be able to target one of the fighters in your party to be the recipient of that item.

Items generally add power to your party members or cure them from a bad state. They often prove to be useful in long, tough battles.

When you’re in the Item list, you can manage your Weapons by pressing up on the Control Pad.

By pressing Left on the Control Pad, you can instruct a fighter to step to the back row when it’s his or her turn to fight.

Press right on the Control Pad to command a member of your party to set up a defensive position.

If you’re not ready to fight, press and hold the L and R Buttons. The members of your party will attempt to make a run for it. You can continue to fight while your party members try to flee.
Changes in Status

Enemies can trigger a variety of damaging "status changes." If you have access to the right items or spells you can correct negative conditions.

<table>
<thead>
<tr>
<th>Condition</th>
<th>Effect</th>
<th>Display</th>
</tr>
</thead>
<tbody>
<tr>
<td>Float</td>
<td>You can defend against the awesome powers of a Quake spell by casting Float on the members of your party.</td>
<td></td>
</tr>
<tr>
<td>Petrify</td>
<td>This strange condition turns your fighters into statues, so that they cannot move or attack. Use Soft to make them return to normal.</td>
<td></td>
</tr>
<tr>
<td>Imp</td>
<td>The Imp spell turns the spell recipient into an Imp. If you wish to cure the condition, you can use a Green Cherry.</td>
<td></td>
</tr>
<tr>
<td>Clear</td>
<td>Clear makes the targeted fighter invisible. Use Remedy to cure this condition.</td>
<td></td>
</tr>
<tr>
<td>Poison</td>
<td>Poison causes the members of your party to lose HitPoints during battle and with every step they take. An Antidote will set things right.</td>
<td></td>
</tr>
<tr>
<td>Zombie</td>
<td>Fighters in a Zombie state are uncontrollable. A shot of Revivify will bring a Zombie back to his or her normal state.</td>
<td></td>
</tr>
<tr>
<td>Dark</td>
<td>Ink-shooting enemies can cover the eyes of their opponents, making them miss many of their attacks. Eyedrop does the job here.</td>
<td></td>
</tr>
</tbody>
</table>
Wounded: If a member of your party has lost all of his or her Hit Points, he or she is "wounded." Fenix Down will cure this condition.

Psyche: Some enemies can cause your fighters to nod off. The only action that will wake them up is a direct attack.

Muddled: Muddled fighters attack monsters and members of their own party. A Remedy is a useful counter to this condition.

Mute: A Mute condition silences the Magic powers of your party members. Echo Screen will give them a voice again.

Condemned: Condemned party members will lose all of their Hit Points if the countdown above them reaches zero.

Berserk: This condition makes fighters go wildly out of control. Use Dispel to bring them back to normal.

Slow: Fighters that have been targeted by a Slow spell will be slow to return to battle readiness after they make a move.

Stop: If your fighters have been hit by Stop, time is standing still for them. Use Dispel to get the clock ticking again.

Regen: You can use Regen on the members of your party to make them regain Hit Points at regular intervals during a fight.
Village Locations

There are several villages in the world of Final Fantasy III. In addition to gathering important information from the villagers on the streets and in houses, you can revitalize the members of your party at Inns and purchase Items in shops.

Inns

If the members of your party are suffering from a negative change in Status or if their Hit Points or Magic Points are low, you can power them up for a small fee at an Inn.

Weapon Shops

Weapon shops offer a variety of powerful items that will add to the performance of your fighters in the field. If you're low on cash you can sell old Weapons for half their purchase price.

While you're shopping for Weapons and Armor, you'll notice a lineup of fighters at the bottom of the screen. Each fighter will raise his or her arms if he or she can be equipped with a particular item.
Armored Shops
If you're in the market for protective gear, an Armor Shop is the place to be. Look through the list of items available and purchase the items which will be of the greatest benefit to your party.

Item Shops
Items are generally used to replenish Hit Points and to cure fighters from changes in Status. Stock up with as many Items as you can afford before you venture into the unknown.

Relic Shops
Every fighter in your party can equip up to two Relics. Buy as many different types of Relics as you can afford and use them wisely.

Chocobo Stables
Chocobos are available in a few villages and remote forest locations. For a fee, you can hop onto a Chocobo and ride across the fields, free of enemy intervention.

Cafes
While you're in town, make sure you visit these establishments to catch up on current events.
# Items

You can hold up to 99 of each type of Item. They can be found in Item Shops and Treasure Chests. You can also earn some Items by defeating enemies.

<table>
<thead>
<tr>
<th>Item</th>
<th>Effect</th>
<th>Cost</th>

<td>No Cost</td>
</tr>
<tr>
<td>Dragoon Boots</td>
<td>These nifty boots change the Fight command into a Jump command.</td>
<td>9000</td>
</tr>
</tbody>
</table>
Espers

The magic force of the Espers can be learned by fighters who are equipped with Espers while they earn Magic Points. When a fighter learns 100 percent of an Esper's spell, he or she can use the spell.

Equipping Espers

Each fighter in your party can use one Esper at a time. Select the Esper command from the Skills heading for a particular fighter and move the cursor to an Esper that is highlighted, then press the A Button to equip that Esper.

Select from the list an Esper which is not already being worn by a member of your party, then press A.

While you wear the Esper, Magic Points you earn will go toward learning the Esper's spells.

Bonus Points

As your fighters increase their Experience Levels, some Espers will reward them with extra powers.
Listed below are the Espers and their spells. The numbers next to the spells are the learning rates. These numbers are multiplied by earned Magic Points. When the results reach 100, the spells are learned.

</table>
Magic Spells

Some warriors who join up with your party will be born Magic users, but the bulk of the fighters will have to learn Magic from the Espers.

Spell Collection

Every Esper offers a series of Spells for the wearer to learn. Some Spells are offered by more than one Esper. When a fighter learns 100 percent of a particular Spell, he or she can use it.

Different Espers, Different Speeds

Some Spells are offered by more than one Esper, but the learning speeds vary. Compare the learning speeds so you can learn each spell as quickly as possible.

Magic, Armor, Weapons and Items

Some items other than Espers allow adventurers to learn spells. Try experimenting by equipping with a variety of Armor and Weapons.
**Recovery Magic**

**Cure**
A single Cure spell can recover as much as 270 Hit Points. The casting cost is five Magic Points.

**Cure 2**
Cure 2 is capable of reviving a fighter with three times as many Hit Points as the first Cure spell.

**Cure 3**
This Hit Point reviving spell is seven times as powerful as the original Cure spell.

**Life**
This spell has basically the same effect as a Fenix Down. It brings wounded fighters back to fighting strength.

**Life 2**
This deluxe spell revives a fighter from Wounded status and replenishes all of his or her Hit Points.

**Life 3**
Life 3 has the same initial effect as the original Life spell. It revives the fighter when Hit Points are depleted.

**Antidot**
For an affordable casting cost of three Magic Points, this spell cures fighters from Poison.

**Remedy**
The Remedy spell has the same effect as the Remedy item: recovery from all status changes except Zombie.

**Regen**
The Regen spell revives Hit Points at regular time intervals for several seconds after being cast.

---

**Offensive Magic**

**Fire**
Enemies will be on the receiving end of a blast of heat and flame when this spell is cast in their direction.

**Fire 2**
This blazing spell offers three times the blast of the first Fire spell for a cost of 20 Magic Points.

**Fire 3**
Fire 3 is the strongest Fire spell at six times the power of the original. The cost is 57 Magic Points.

**Bolt**
Lightning strikes attacking enemies when the members of your party have the power to cast Bolt.

**Bolt 2**
The second incarnation of Bolt Magic has three times the power of the first Bolt spell.

**Bolt 3**
This lightning spree is six times as powerful as the original. The casting cost is 53 Magic Points.

**Ice**
This freezing spell is especially powerful against snakes, frogs and other slimy creatures.

**Ice 2**
Ice 2 has three times the power of Ice. The casting cost is 21 Magic Points.

**Ice 3**
This freezer is six times as powerful as the original for a casting cost of 52 Magic Points.
Offensive Magic

**Poison**  By casting Poison on your enemies, you can cause gradual damage for a cost of three Magic Points.

**Drain**  Drain magic takes Hit Points from the enemy and gives them to the caster until the caster is maxed out.

**Bio**  The Bio spell is similar to Poison, causing multiple hits as time goes on, only it is more powerful.

**Break**  The Break spell turns enemies to stone at a cost of 25 Magic Points.

**Doom**  The awesome power of Doom will destroy most enemies when it hits.

**Pearl**  This elemental attack can be cast at a cost of 40 Magic Points.

**Flare**  The Flare spell hits several enemies at once for big damage at a cost of 45 Magic Points.

**Demi**  At a cost of 33 Magic Points, this spell can cut an enemy's Hit Points in half.

**Quartr**  The Quartr spell is half as powerful as the Demi spell at a cost of 48 Magic Points.

**X-Zone**  This mysterious spell sends enemies into the X-Zone for a cost of 53 Magic Points.

**Meteor**  With this spell, the battleground changes to outer space and a meteor hits the enemy target.

**Ultima**  This super-powerful spell hits all attacking creatures at a cost of 80 Magic Points.

**Quake**  The ground shakes and hits all ground-bound enemies when this spell is cast.

**W.Wind**  This spell hits the enemy target with a tornado that takes 90 percent of its Hit Points.

**Merton**  At a cost of 85 Magic Points, this spell hits the enemy target with a piercing fire attack.

Effect Magic

**Scan**  For a casting cost of 3 Magic Points, you can examine the enemy's power and weak points.

**Slow**  Your enemy takes more time to gear up for an attack when you cast this spell.

**Rasp**  This unusual spell takes Magic Points away from the enemy target.

**Mute**  When an enemy is hit with Mute, it can't use Magic to retaliate.

**Safe**  The Safe spell raises the defensive power of the targeted fighter.
**Sleep**

Enemies will be knocked unconscious when this spell is cast upon them.

**Slow 2**

This spell succeeds at slowing down the battle readiness of all attacking enemies.

**Muddle**

For a casting cost of 8 Magic Points, you can confuse the enemies so they hit each other.

**Osmose**

You can take away enemy Magic Points with this spell.

**Haste**

The Haste spell gives the targeted fighter the ability to ready for attacks more quickly.

**Warp**

The Warp spell has the same effect as the Warp Stone, allowing you to escape from fights and caves.

**Stop**

For a casting cost of 10 Magic Points, you can temporarily freeze your enemies in time.

**Quick**

This 99 Magic Point spell gives your party the speed advantage over attacking enemies.

**Bserk**

A fighter hit with a Bserk spell will attack before receiving orders to do so.

**Dispel**

The Dispel spell dissolves enemy spells cast on your characters at a cost of 25 Magic Points.

**Float**

This levitation spell is the perfect defense against Quake.

**Imp**

This spell changes the target creature to or from the strange Imp beast.

**Reflect**

The Reflect spell reflects enemy spells at a cost of 22 Magic Points.

**Shell**

The Shell spell is a defensive barrier that protects the target character from enemy spells.

**Vanish**

This spell makes the target character temporarily invisible.

**Haste 2**

Haste 2 speeds up the battle readiness of your entire party.
Building Parties

Adventuring parties can include up to four fighters. There are considerably more than four fighters who are willing to join up with you. At certain points, you can make a new party from all of the available fighters.

Party Planner

There are only a few places where you can regroup your party. One of those places, the Airship, is mobile. If you're looking to change your party, find the Airship or head to Narshe.

Special Events

There are a few instances when slightly modified controls or actions will come into play. They are as follows:

Multi-Party Battles

When you're managing more than one party in a battle against another multi-party side, you can switch control from one party to the next by pressing the Y Button.

Opera House and Dinner Party

Your verbal responses will play an important role in a pair of social circumstances. In these cases, you'll be given the choice of several things to say (or sing). The results of the interaction will be dependent on your choice of words.

Follow the Star

The solution to a dungeon maze is revealed by the flight of a star. You must move your party in the same pattern as the star in order to get through the maze.

Look for other unusual events throughout the course of the game.
Character Guide

Terra

Terra represents the rebirth of magic. She has abilities the likes of which no one in the world has seen before. The evil army has tried to harness her magic powers, but the magic of the Espers will see to it that she will escape from the army's control.

Special Skill  Morph

When Terra learns more about herself and her origins, she will gain the ability to morph into a blazing, spirit-like creature. She'll have twice as much strength in her morph state as she has in her normal form.

Terra begins the adventure as a normal creature with moderate magic powers. When she learns to Morph, Terra will have twice her previous strength.
The great treasure hunter, Locke, doesn't mind breaking a few locks in his search for fortune and fame. Nevertheless, he'd rather be called a hero than a thief. Locke's strong will and cunning make him a good ally.

**Special Skill** Steal  
**Powerup Accessory** Thief Glove  
**Capture**

Locke can actually take possessions from attacking enemies in the middle of a fight. His Steal skill will come in handy more than once as he lifts valuable items and, sometimes, the clothes from the backs of unsuspecting enemies.

With the Steal command, Locke can remove items from enemies.

The Thief’s Glove Relic gives Locke the power-packed Capture command.
Mog

Don't let his cute looks deceive you. The teddy bear-like Mog can fight with a vengeance, especially when he has learned his powerful, magical dances. Mog is generally a peaceful creature, but he can make a big commotion on the dance floor.

Special Skill  Dance

Mog can learn a series of dances for each of the eight types of terrain in the world. After he gets one good hit in a fight, he'll learn the dances of the region. Then he'll go into hoofing high gear.

Before he can Dance, Mog has to fight and learn the steps. Mog's Dances will send his audience to the floor.
Wind Song
In the grass fields of the world, Mog learns the dances of the Wind Song.

Wind Slash
This collection of steps will blow monsters away.

Sun Bath
Fun in the Sun recovers Hit Points for the whole party.

Plasma
This little jig sends out a bolt of devastating power.

Cockatrice
The power of the Cockatrice dance pierces enemy defenses.

Forest Suite
When Mog fights in the woods, he learns the dances of the forest.

Rage
This strong blast blows leaves into enemy forces.

Wild Bear
By dancing the Wild Bear, Mog recovers the status of the party.

Elf Fire
The Elf Fire steps set the dance floor ablaze.

Wombat
This fierce shuffle breaks through enemy defenses.

Desert Aria
In the desolate desert regions, Mog learns the dances of the sand and wind.

Sand Storm
Enemies will be lost in the flurry of this wild dance.

Wind Slash
This blowing swing is also part of the Wind Song package.

Antlion
The Antlion dance is another powerful blast of wind.

Kitty
This cat dance casts Haste on the party for more speed.

Love Sonata
Mog can learn these steps in rare situations when he fights in a town.

Elf Fire
This fiery dance is also part of the Forest Suite collection.

Snare
The trapping Snare dance causes enemies to fall in a hole.

Specter
This ghostly dance confuses enemies into attacking each other.

Tapir
The magic of the Tapir dance recovers status in all party members.

Earth Blues
The Earth Blues are learned in the mountain regions of the world.

Land Slide
Rocks drop and bowl over enemies as the result of this dance.

Sun Bath
This Hit Point recovering dance is also featured in the Wind Song.

Sonic Boom
This dance produces a boomerang-like weapon.

Whump
The dance of Whump sends an animal attack out on the enemies.

Water Rondo
When Mog goes underwater, he can learn these dances of the deep.

El Nino
These steps of the Water Family send monsters into the undertow.

Specter
As is the case with the Love Sonata, Specter confuses creatures.

Plasma
This bolt-producing dance is also part of the Wind Song dances.

Wild Bear
As is the case in the Forest Suite, this dance recovers status.

Dusk Requiem
Mog learns these dances in caves. You’ll see him use these dances first.

Cave In
Rocks fall on enemy attackers when this dance goes into effect.

Elf Fire
A blazing flame is the result of this popular dance.

Snare
A phantom hole appears and sends enemies into the ground.

Pois. Frog
The poisonous frog of this dance knocks out enemy Hit Points.

Snowman Jazz
Mog learns the steps of the Snowman Jazz dances in the snow fields.

Snowball
This powerful blast of cold cuts enemy Hit Points in half.

Snare
This hole producing-dance is a popular set of steps.

Surge
The Surge dance is a dance of the Ice family.

Ice Rabbit
This cold bunny hop recovers Hit Points for the party.
Edgar

The King of Figaro castle is very handy with machinery and tools, making him a very valuable part of the team. He also fancies himself to be a ladies' man, but moves in that direction often result in failure.

Special Skills

Edgar's mastery of machinery turns out to be a very useful skill. He can use all eight Tools that are available throughout the adventure. Many of them can defeat an entire party of attacking enemies at once.

Tools

- Autocrossbow: This arrow-firing device will hit all of the attacking enemies.
- Drill: When Edgar uses the Drill, he can go right through one enemy's defenses.
- Bio Blast: The Bio Blast sends out a green cloud of gas over all of the enemies.
- Debilitator: This odd item finds weak points in enemy attackers.
- Flash: The Flash hits monsters with a brilliant Hit Point-reducing light.
- Chainsaw: This hard to find item is capable of destroying an enemy attacker with one slash.
- Noise Blaster: This big horn sends out a noise that confuses the enemy party.
- Air Anchor: The Air Anchor is capable of making enemy attackers self-destructive.

The Tools command puts powerful machinery in Edgar's hands. Most of the Tools hit enemies with a very strong blast.
Sabin

Sabin is the brother of King Edgar. After a falling-out with his family, Sabin left for the mountains and learned the martial arts. Sabin’s Blitz techniques and strong conviction make him a good member of the team.

Special Skills

Blitz

The Blitz techniques that Sabin learns over the course of the adventure each call for a different button-pressing combination. You can see those combinations using the Skills Menu from the subscreen.

- Pummel
  When Sabin Pummels an enemy, he hits it with punching bag precision.

- Mantra
  Sabin’s Mantra brings Hit Point recovery to the members of his party.

- AuraBolt
  The Aura Bolt sends out a white blast that pierces enemy defenses.

- Air Blade
  The complicated sequence of the Air Blade results in a wind-blown attack on all enemies.

- Suplex
  Using this wrestling move, Sabin lifts enemies high above the ground and slams them down.

- Spiraler
  The selfless Spiraler move takes Hit Points away from Sabin and gives them to the party.

- Fire Dance
  The dance of flames spreads fire onto all of the enemy attackers.

- Bum Rush
  This tough technique delivers one big hit to a single enemy.
Cyan

Cyan is a soldier and swordsman of Doma Castle. An enemy attack on the castle has convinced him to join the resistance against the evil army. His sword technique will prove to be very useful.

Special Skills: SwdTech

The master of the sword can lash out at enemies with a series of brilliant strikes. There are eight different techniques in all. The advanced techniques require more preparation time than the others.

- **Dispatch**
  - This quick attack has good results when it centers on a single enemy.

- **Empowerer**
  - This advanced technique takes Magic Points and Hit Points from the enemy.

- **Retort**
  - When Cyan is using Retort, he automatically attacks after being hit.

- **Stunner**
  - This incredible blast of Magic hits the whole attacking party and stops them.

- **Slash**
  - With the Slash technique, Cyan hits enemies and earns Hit Points.

- **Quadra Slice**
  - The Quadra Slice hits four times with twice the strength of the Quadra Slam.

- **Quadra Slam**
  - It takes a while to prepare for, but this four-slash blast is worth it.

- **Cleave**
  - This most advanced sword technique hits the entire attacking party for big damage.

Cyan must build up a certain amount of power for each technique. When Cyan slashes, his enemies take notice.
Gau

The wild boy of the Veldt left home when he was very young. He now lives and communicates with the animals. If you can manage to get Gau to join your party, you'll be able to use his abilities to learn the powers of the Veldt animals.

**Special Skills**

**Leap / Rage**

When Gau is fighting with your party in the Veldt, he can Leap onto one of the attacking creatures and ride away with it. Gau will reappear in another Veldt encounter with knowledge of the monster's fighting techniques.

Use Leap to make Gau learn the techniques of the monsters. Use Rage to carry out Gau's learned techniques.

**Rage on the Veldt**

**Learning the Skills of the Monsters**

Gau has the unique ability of being able to communicate with ferocious beasts of the Veldt and learning their methods of attack.

In the next encounter, Gau is missing from the party.

Gau returns, knowing the enemy's method of attack.

Gau's Rage demonstrates his knowledge of enemy attacks.

When Gau uses his Rage skill, he can choose from a long list of enemy skills that he has learned to use. Some are more useful than others.
Shadow

The mysterious ninja, Shadow, is a loner. His only friend is his dog, Interceptor. When Shadow joins the party, he brings with him the ability to throw objects with accuracy.

He owes allegiance to no one, and will do anything for money. He comes and goes like the wind...

Special Skills

Throw

Shadow’s throwing skills allow him to hit enemies with no danger to himself. Some village shops sell Weapons that the ninja can aim at enemy attackers. They have varying strengths and properties.

Shadow can throw a variety of items designed with that purpose in mind. A direct hit can make a big impression on enemy attackers.
Celes

At one time, Celes was a General of the evil army. She has since been disillusioned by the army and has decided to join the resistance. She has command over Runic Blade which absorbs enemy spells.

Special Skills  Runic

Celes has the power of Runic which, when cost, makes all enemy spells target her. She can absorb the spells without causing much damage to her or the other members of the party.

Use Runic to thwart enemy magic users.

Spells will target Celes and fizzle out, giving her MPs.
Setzer

The rich owner of the only Airship in the world likes to fly and he likes to gamble, too. When Setzer joins your party, you'll be able to use his Airship to travel to remote parts of the world. You'll also gain a worthy fighting partner.

**Setzer's Slots**

The effect of the Slot command depends on where the wheels stop.

**7-Flush**

All 7's brings defeat to the entire enemy party.

**Joker Doom**

This unfortunate combination brings defeat to both parties.

**Lagomorph**

Any losing spin earns some Hit Points and status recovery.

**H-Bomb**

This three-Airship combo hits all of the enemies with a strong blast.

**Magicite**

Three Bars will bring out a randomly chosen Esper for a big attack.

**Chocobop**

This Chocobo combo calls out a flock of trampling birds.

**Mega Flare**

The result of this spin is similar to that of the Flare spell.

**Flash**

When three Diamonds appear, the enemies receive a blast of light.

**Special Skills**

Setzer's Slot attack is a bit of a gamble. When he uses it, the wheels of a slot machine appear and start spinning. The results of the spin determine the nature of the attack.

Setzer has access to the strange and powerful Slot attack.

If you're lucky, the attack will result in a big win.

**Powerup Accessory**

**Coin Toss**

When Setzer is equipped with the Coin Toss Relic, his Slot command changes to GP Rain. This attack uses gold coins, costing as many coins as points of damage it inflicts.

**GP Rain**

The Coin Toss relic turns Slot into GP Rain. Coins-a-plenty rain down on unsuspecting monsters.
Strago

The old man, Strago, is both a passive and powerful Blue Mage. He has the ability to learn the spells of some enemy attackers, but he must feel the effect of those spells before he can use them.

---

**Special Skill**

**Lore**

The special skill that Strago brings to your party is Lore. When enemies aim their spells at Strago and he is hit, he bounces back with knowledge of the spells after the battle has been won.

- The Lore command brings up a list of learned spells.
- Strago can use spells that he has experienced first hand.

---

**Aqua Breath**

This spell is the special attack of the water elemental.

**Roulette**

The Roulette spell results in an unpredictable attack.

**Big Guard**

Safe and Shell spells are combined with the Big Guard.

---

**Stone**

This spell creates a damaging and confusing stone attack.

**Explorer**

This super-charged spell results in big damage.

**Pep Up**

This magic cures one character, but spells doom for Stragos.

---

**Aero**

The Aero spell emits a blustery blast of wind.

**Clean Sweep**

Like the Aqua Breath, this a water elemental specialty.

**Reflect???**

The effects of this Reflect spell relate to status changes.

---

**Dischord**

This spell decreases the enemy’s experience level by one half.

**Rippler**

The Rippler spell makes enemies trade status with party members.

**Revenge**

The Revenge spell deals an equalizing blast.

---

**Quasar**

The Quasar attack pierces enemy defenses.

**L.3 Muddle**

Characters with levels at a multiple of 3 are confused.

---

**Sour Mouth**

This strange spell cures status changes in party members.

**L.4 Flare**

Characters with levels at a multiple of 4 are hit with a Flare.

---

**Grand Train**

The Grand Train rolls through enemy defenses.

**L.5 Doom**

Characters with levels at a multiple of 5 are destroyed.

---

**Condemned**

This spell creates a countdown to doom for the enemy.

**Pearl Wind**

When the Pearl Wind blows, party members experience recovery.

**L? Pearl**

The multiple factor is the last digit of your GP total.
Relm

The granddaughter of Strago, Relm is a great artist and a friend to Shadow's dog. She can sketch enemies and attack with their powers through her drawings.

In her pictures she captures everything: forests, water, light... the very essence of life...

Special Skill Sketch

Relm's special skill centers around her artistic abilities. When she sketches an enemy, she learns that enemy's methods of attack. She can also control enemies while wearing the Fake Mustache relic.

The Sketch command allows Relm to attack with the powers of her enemies. Relm is a living reminder of the power of art.
Save Your Progress
It pays to save your progress when you have the chance. Always save immediately before you enter a no save situation.

Explore Thoroughly
There are many hidden items in the World of the game. Get in the habit of touching objects and pressing the A Button to find items.

Adventurer's Advice
Before you begin exploring the World of Final Fantasy III, you should take a look at these helpful tips and live by them when you embark on your adventure.

Buy Potions Galore
In the early parts of your adventure, Potions and Terra's limited Heal spell are the only things that will keep your party going.

Losers Prosper
Even if the members of your party are annihilated, they'll still retain their Experience Points. Don't reset the game.

Equip on Party Changes
When characters join your party, make sure to take a look at their equipment. They may be in need of Weapons or Armor that you have.

Esper Management
Some Espers give rewards when your characters go up in Experience Levels. Make sure to equip with those Espers before leveling up.
The Story Begins

Two soldiers escort the captured magic user, Terra, on Magitek machines. She is unaware of her magical origins. But, soon she will remember...

Magitek machines emit powerful blasts of energy.

When monsters are defeated, you'll earn Experience Points.

An eerie glow surrounds you.

The first opportunity to save progress is in this cave.

The Boss monster of the first cave is a giant snail.

Aim a Tekmissile on the enemy's head. Don't attack the shell.

Multi-Party Battle

This battle is for the protection of Terra.

Mog learns the Dusk Requiem Dance in the cave.

You'll find training facilities outside Narshe.

Received "Tincture!"

Inside, you can save, recover Hit Points and pick up tips.

Figaro Bound

Locke is good friends with Edgar, the King of Figaro. When things go sour in Narshe, Locke takes Terra to the safety of Figaro Castle.

Once you're in the field, you can save your progress anywhere.

Figaro Castle is in the middle of the desert.
On to South Figaro

The drama between Edgar and the evil Kefka results in the sinking of the Castle in the desert. Edgar, Locke and Terra venture through a cave to South Figaro. In the cave, they find treasures and the refreshing Water of Recovery.

In the City

South Figaro is in real danger of being taken over by the evil army. Our adventurers decide to leave and seek assistance in their effort to overtake the army. Before they leave, they should buy Sprint Shoes, Potions and Antidotes.

Mountain Adventure

Edgar’s brother is in the mountains. The party meets up with this martial artist and other “Returners.” After some drama, they join each other and decide to move on together.

Mt. Kolts is a maze of caves. A short fight takes place on the mountain top.
Returner Hideout

The Returner Hideout is the headquarters of the resistance. Terra is the key here. She has to talk to the leader, Banon, and make the decision to join the resistance.

River Ride

The growing party takes a raft on the Lete River. While the party fights, Banon provides everyone with recovery from damage using his Health spell.

The Party Splits Up

After the ride on the river, the story splits up into three different scenarios. You’ll eventually play out all three scenarios. The order in which you play them out is your choice.
Locke's Scenario

South Figaro has been taken over by the army. It's up to Locke to go into the city and save Celes. He'll achieve his goal by using his ability to steal from attackers. The clothes of a merchant and a soldier will allow him to explore the city.

Locke can gain access to certain areas of the city by stealing and wearing certain clothes.

Celes is hidden away in the city. Locke must find her.

Banon's Scenario

Banon and Terra leave for Narshe to regroup and find out what to do next. Their quest is straightforward and quick. The only challenge is to find a way into the city.

The main entrance to Narshe is blocked off. You'll find another entrance left of the training area.

Follow the star inside the cave to find the way through this open maze.
Sabin’s Scenario

Sabin has a long road ahead of him. He will start at the edge of the Lete River and work his way through an enemy camp, several towns and a handful of challenging areas. Along the way, he’ll meet up with Cyan, Gau and possibly, Shadow.

Shadow may or may not join up with Sabin - it’s your choice.

When the party boards the Phantom Train, you’ll find a save point in the caboose.

The Phantom Forest is a challenging maze.

Cyan joins when his castle is poisoned by Kefka.

Ghosts in the train fight, sell items and sometimes offer to join you on your journey.

The engine of the train is strong, but your party will win in the end.
Baren Falls

Sabin's odyssey leads to Baren Falls, where he and Cyan go over the edge. The fall is long and dangerous. The pair even end up fighting enemies on their way down, all in the name of adventure.

Serpent Trench

The Serpent Trench is an enemy-packed, fast-flowing river. The party follows the flow of the river and makes a few turns to reach underwater caves and safety in the port town of Nikeah.

The Veldt

When Sabin and Cyan finally reach the bottom of Baren Falls, they wash up on the shore of a river. Here, they make their first contact with the wild boy, Gau. Eventually, they'll be able to befriend Gau by giving him food. Gau knows where Sabin and Cyan can find a mask that will allow them to breathe underwater and continue their adventure to Narshe.

Nikeah

After the members of the party buy items, relics, armor and weapons, they can board a vessel and take off for Narshe where they will meet up with the other members of the resistance.

The Adventurers Regroup

Now that all of the adventurers are back together, they can decide how they will proceed. The first thing to do is be victorious in a decisive battle, then listen carefully to the clues.

Good Luck!
NINTENDO PLAYER'S GUIDE

Get the complete lowdown on Final Fantasy III in this 160-page player's guide, available now from Nintendo. The guide includes complete maps, strategies, and lists of Items and Spells. A true adventurer can't be caught without it.
